B.TECH CSE (CORE) · FIRST YEAR · VIT VELLORE

Code, circuits & design.

I'm Aryan Shrimali, a Computer Science student who builds Arduino projects, designs posters and packaging, and is learning Python and web development.

01 / ABOUT

About me.

I'm a first-year Computer Science and Engineering student at **VIT Vellore** who likes turning ideas into things that work.

I'm learning Python, HTML and CSS, and I have a good understanding of Arduino and the sensors used with it. I enjoy wiring circuits, programming them and testing how they behave in the real world.

I also design. I'm comfortable with Adobe Lightroom, Illustrator and Photoshop, and I have freelanced for 2–3 months creating posters and event images.

02 / PROJECTS

Selected projects.

One hardware build and one design project, with what I made and what I took from each.

PROJECT 01

HARDWARE · ARDUINO

Arduino *Solar Tracker*

A solar tracker that adjusts a solar panel's position to face a light source, controlled by an Arduino.

Highlights

- Sensors detect and compare light intensity.
- The Arduino reads the sensors and adjusts the panel's orientation.
- Wiring, code and testing come together in one working build.

↗ **What I learned**

How a programmed system can respond to its surroundings, and how testing improves a design.

PACKAGING MOCKUP / AKEJA SALTED BANANA CHIPS

PROJECT 02

DESIGN · PACKAGING

Chips Packet *Design*

Packaging for Akeja banana chips, designed for a local shop. The goal was a fresh, simple look that feels natural and local.

Design choices

- Soft green pouch with hand-drawn spiral motifs for a handmade feel.
- Palm-grove and farm illustration along the base, showing where the chips come from.
- Close-up chip and a clear “Salted” label so the flavour reads at a glance.

Outcome

The shop later moved to transparent packaging to save cost, so the design was not printed. It still took a brief from idea to finished mockup.

03 / EXPERIENCE & ACHIEVEMENTS

Experience & achievements.

PRIZE DISTRIBUTION · SCIENCE EXHIBITION

ACHIEVEMENT · INSTITUTION-LEVEL EXHIBITION

1st Place, *Science Exhibition*

Won first place at an institution-level science exhibition, competing against students from a group of schools.

EXPERIENCE · 2–3 MONTHS

Freelance Designer

Created posters and event images as a freelance designer, working in Adobe design tools.

04 / SKILLS

Skills & tools.

What I use, and how well I know it.

01

Py

Python

Programming fundamentals and problem-solving.

LEARNING

02

</>

HTML & CSS

Building and styling clear, well-structured web pages.

LEARNING

03

Arduino & Sensors

Programming Arduino boards and working with sensors.

GOOD UNDERSTANDING

04

Design

Lightroom, Illustrator and Photoshop for posters, event images and packaging.

COMFORTABLE

WORKING STYLE

- Clear communication
- Calm under pressure
- Quick to adapt
- Teamwork
- Creative thinking

CONTACT

Get in touch.

Have a project, an idea or a question? Send me an email and I'll get back to you.
